

Avital & Jochen - outdoor show

technical requirements

dimensions:

required floor space for tensioning wires: 10m x 14m (width x depth)
required swinging space in the air: 4m x 16m x 9,5m (width x depth x height)
audience distance: min 5m from the rig to front and back

-Audience can sit in the round but with a distance of 5m

ground:

- flat

- possible to put stakes for tensioning wires (no gas, water or electricity lines underneath)
as an alternative to stakes weights (watertanks) can be used 4 x 2 tons (front/back), 2 x 1 ton (towers)

time:

initial set up time: 5 hours
build down time: 3 hours
preset time between shows: 60 min

sound:

appropriate PA
player for SD/USB
mixing desk:

input: 3 x XLR (2 x mic, 1 x Loop station), 1 x cinch (SD / USB - player)
output: 1 x monitor

(we can provide our own PA but for maximum 500 audience and added set up time)

electrical power supply: 220 V (excluding lights)

lights:

if the show is at night time, sufficient lighting is required for the entire swinging space
swinging space in the air: 4m x 16m x 11,5m (width x depth x height)

backstage facilities:

changing room and toilets in proximity to the rig

weather:

temperature: 15°C to 40°C

wind: if the wind pushes Avital more than half a meter we have to cancel

rain: a little bit is Ok, but when everything gets wet we have to cancel

stage:

looks best on a low stage (10 cm to 20 cm high), consisting of two adjoining parts

stage 1: 7,5 m x 3,75 m (width x depth)

stage 2: 3,75 m x 2,5 m (width x depth)

- or we can provide our own stage carpet
